

DCP Teledentistry Guidelines

These guidelines provide Dental Care Professionals with clear steps for delivering safe and effective teledentistry.

1. Verify patient identity and obtain consent prior to any remote assessment.
2. Capture clear intraoral photographs or video following standard imaging instructions.
3. Ensure secure upload of all patient data through approved platforms.
4. Support synchronous and asynchronous examinations by assisting with scanning, lighting, positioning, and communication.
5. Document all findings, images, and advice in accordance with professional standards.
